

Exploring Solar in PA

Spotts, Stevens and McCoy
1047 North Park Road | Reading, PA | 19610

Presented by

Empower Your World.

Join the Seminar

WHY NOW?

Prices for solar systems have fallen by nearly 60% over the past five years. The lowered prices combined with incentives currently available make solar particularly attractive

Immediate Savings

Solar energy is produced economically, leading to immediate savings for operating budgets. Most non-profits who contract for solar reduce their electric bills by 10-20%.

Lock in Your Energy Costs

With solar power, you are less dependent on the utility company and the fluctuating prices of energy commodities like oil and gas. This protects your organization from the outside spikes of energy costs.

Long-Term Residual Value

The dependable, sustainable technology of solar creates energy for decades.

Capture Value and Reduce UV Ray Exposure

Solar allows you to collect the value from the sun that would otherwise go wasted each year and wear down your roof from damaging UV rays.

Environmentally Friendly and Simple

Solar Power is pollution free; its renewable and does not create any greenhouse gases. There are no moving parts and it is noise-free.

Positive Message

People like supporting organizations that utilize renewable energy, and employees have higher morale and a better view of their leadership team.

WHO SHOULD ATTEND?

This seminar will benefit municipal officials and personnel who are responsible for managing electrical energy systems and associated costs.

DATES & LOCATIONS

February 21 | 7:30 - 11:30 a.m.
