A.S. Alternative Energy
Technology
*Hawkeye Community
College*

Background

Mr. Biederman began work in the solar industry in 2014 at Cedar Valley Energy. He developed and deployed solar energy projects in the local area.

In 2015, Mr. Biederman began to work with RER Energy Group, assisting with design and estimation. He took the lead on design and oversight of the Cedar Falls Utilities project, which was brought in on time and on budget.

In 2016, Mr. Biederman took over as lead designer and project manager of all RER projects. In this role he deployed many successful projects across the country, continuing his record of bringing them in on time and on budget.

With RER's continued success and expansion, Mr. Biederman now focuses on pre-construction activities including design, estimation of project costs and energy production, and engineering management. He continues to provide support to all other team members as necessary.
