RER Energy Group

2017 - Present:
GoSeese Engineering LLC

2014-2020
Army Combat Medic
Sergeant – E5

Education

Electronics Engineering,
Des Moines Area
Community College

Licenses/Certs

Fiber Optic Installer

Role/Relevant Experience

In his capacity as leader of the Operations and Maintenance team, Jeff oversees the maintenance of all arrays built by RER Energy Group, as well as providing service for arrays built by other companies. Jeff and his team ensure the optimal performance of arrays over time and provides troubleshooting whenever performance deficiencies or other maintenance issues are identified. Jeff brings technical experience and diagnostic skills to ensure all RER arrays are performing at their peak generating state.

Jeff has worked for years as an Electronics Engineer designing, building, and troubleshooting custom PCBs (Printed Circuit Boards). These PCBs are currently in use today at large nationwide grocery stores for remote monitoring.

Jeff's entrepreneurial and military experience allowed him to develop strong leadership and communication skills that he uses every day collaborating with clients, team members and outside partners.
